

PROGRAMMING LOGIC AND DESIGN

Create your own problem, based on real-world situations and create a pseudocode and a flowchart for your problem's solution.

Problem:

I am on the market and my mother wants me to buy fresh avocados. How can I buy these avocados and fulfill my mom's assigned task on me?

Pseudocode:

STEP 1: Walk and look for the stalls that are selling avocados.

STEP 2: Check the avocados if fresh.

STEP 3: If fresh, buy it.

STEP 4: If no, keep looking.

Flowchart:
